

# DATA CONVERSION

## Integrated Product Support

Sonovision has developed an innovative conversion service that converts legacy data effectively and efficiently, including developing a unique DITA, S1000D or iSpec2200 solution to fit your exact requirements.

### BENEFITS

-  • A complete end-to-end and fully customisable service to fit your exact needs.
-  • The facility to combine any conversion and a revision as one convenient solution.
-  • Reduced costs and time savings compared to traditional conversion.
-  • Work with you every step of the way, ensuring all requirements are met.

We have over 70 years experience in Technical Publication writing to a variety of standards. Our service can work with multiple file input types to suit your current documents, bringing them together easily to create one uniformed solution. Currently working at a clip of around 1,000 pages a day which is entirely scalable as required.

## Input document types include:

- Wordperfect
- SGML
- S1000D 2.3
- XML
- Vector PDF
- S1000D 3.0
- HTML5
- Framemaker
- S1000D 4.0
- Microsoft Word
- S1000D 1.8
- S1000D 4.0.1
- Interleaf/  
Quicksilver
- S1000D 2.1
- S1000D 4.1
- S1000D 2.2
- S1000D 4.2

## Output options available are:

- PDF
- XML
- SGML
- HTML5
- S1000D 2.1
- S1000D 2.2
- S1000D 2.3
- S1000D 3.0
- S1000D 4.0
- S1000D 4.0.1
- S1000D 4.1
- S1000D 4.2
- S1000D 5.0
- iSpec2200
- Framemaker
- DITA

## WHAT SETS SONOVISION APART?

- We share our innovative developments, allowing you to save on costs and time as standard when compared to traditional conversion services.
- Documents can be published to any format you require. This includes mimicking an original document's look and feel to make the conversion transparent to the user.
- Our service is fully customisable, giving you what you need and want no matter your requirements.
- Changes can be incorporated in the document even after conversion to bring it up to the latest template/standards.

- We develop conversion strategies to leverage S1000D to achieve your business objectives.
- Our in-house experts walk you through the entire process, ensuring the conversion you receive is what you want and need.
- Sonovision works collaboratively with clients to develop business rules and your specific BREX.
- We create DMRLs and solve multiple problems at the same time with our single solution.

## RELATED TOPICS:

### Technical Documentation

We are experts in Technical Authoring, Technical Illustration & Technical Translation across multiple sectors. Our first-class service supports clients worldwide, offering solutions tailored to specific requirements.

### Robotic Process Automation (RPA)

We have developed a variety of RPA applications to increase efficiency in data processing. The software applications (BOTs) perform a variety of repetitive tasks efficiently, resulting in cost benefits for our clients.

### Product Lifecycle Management (PLM)

Our team can perform any logistic support analysis necessary to plan and optimise the lifecycle of complex systems. Through thorough processes and industry-standard tools (such as the S-Series), we improve total cost of ownership and secure value for both manufacturers and end customers.
